

iMediaCast

Easy install. Easily used.

iMediaCast

Connect mobile devices to the TV.
Connection options for most devices.

iMediaCast offers an innovative, affordable way to upgrade hotel in-room entertainment offerings which enables guests to effortlessly mirror and stream content from their mobile devices to the in-room TV.

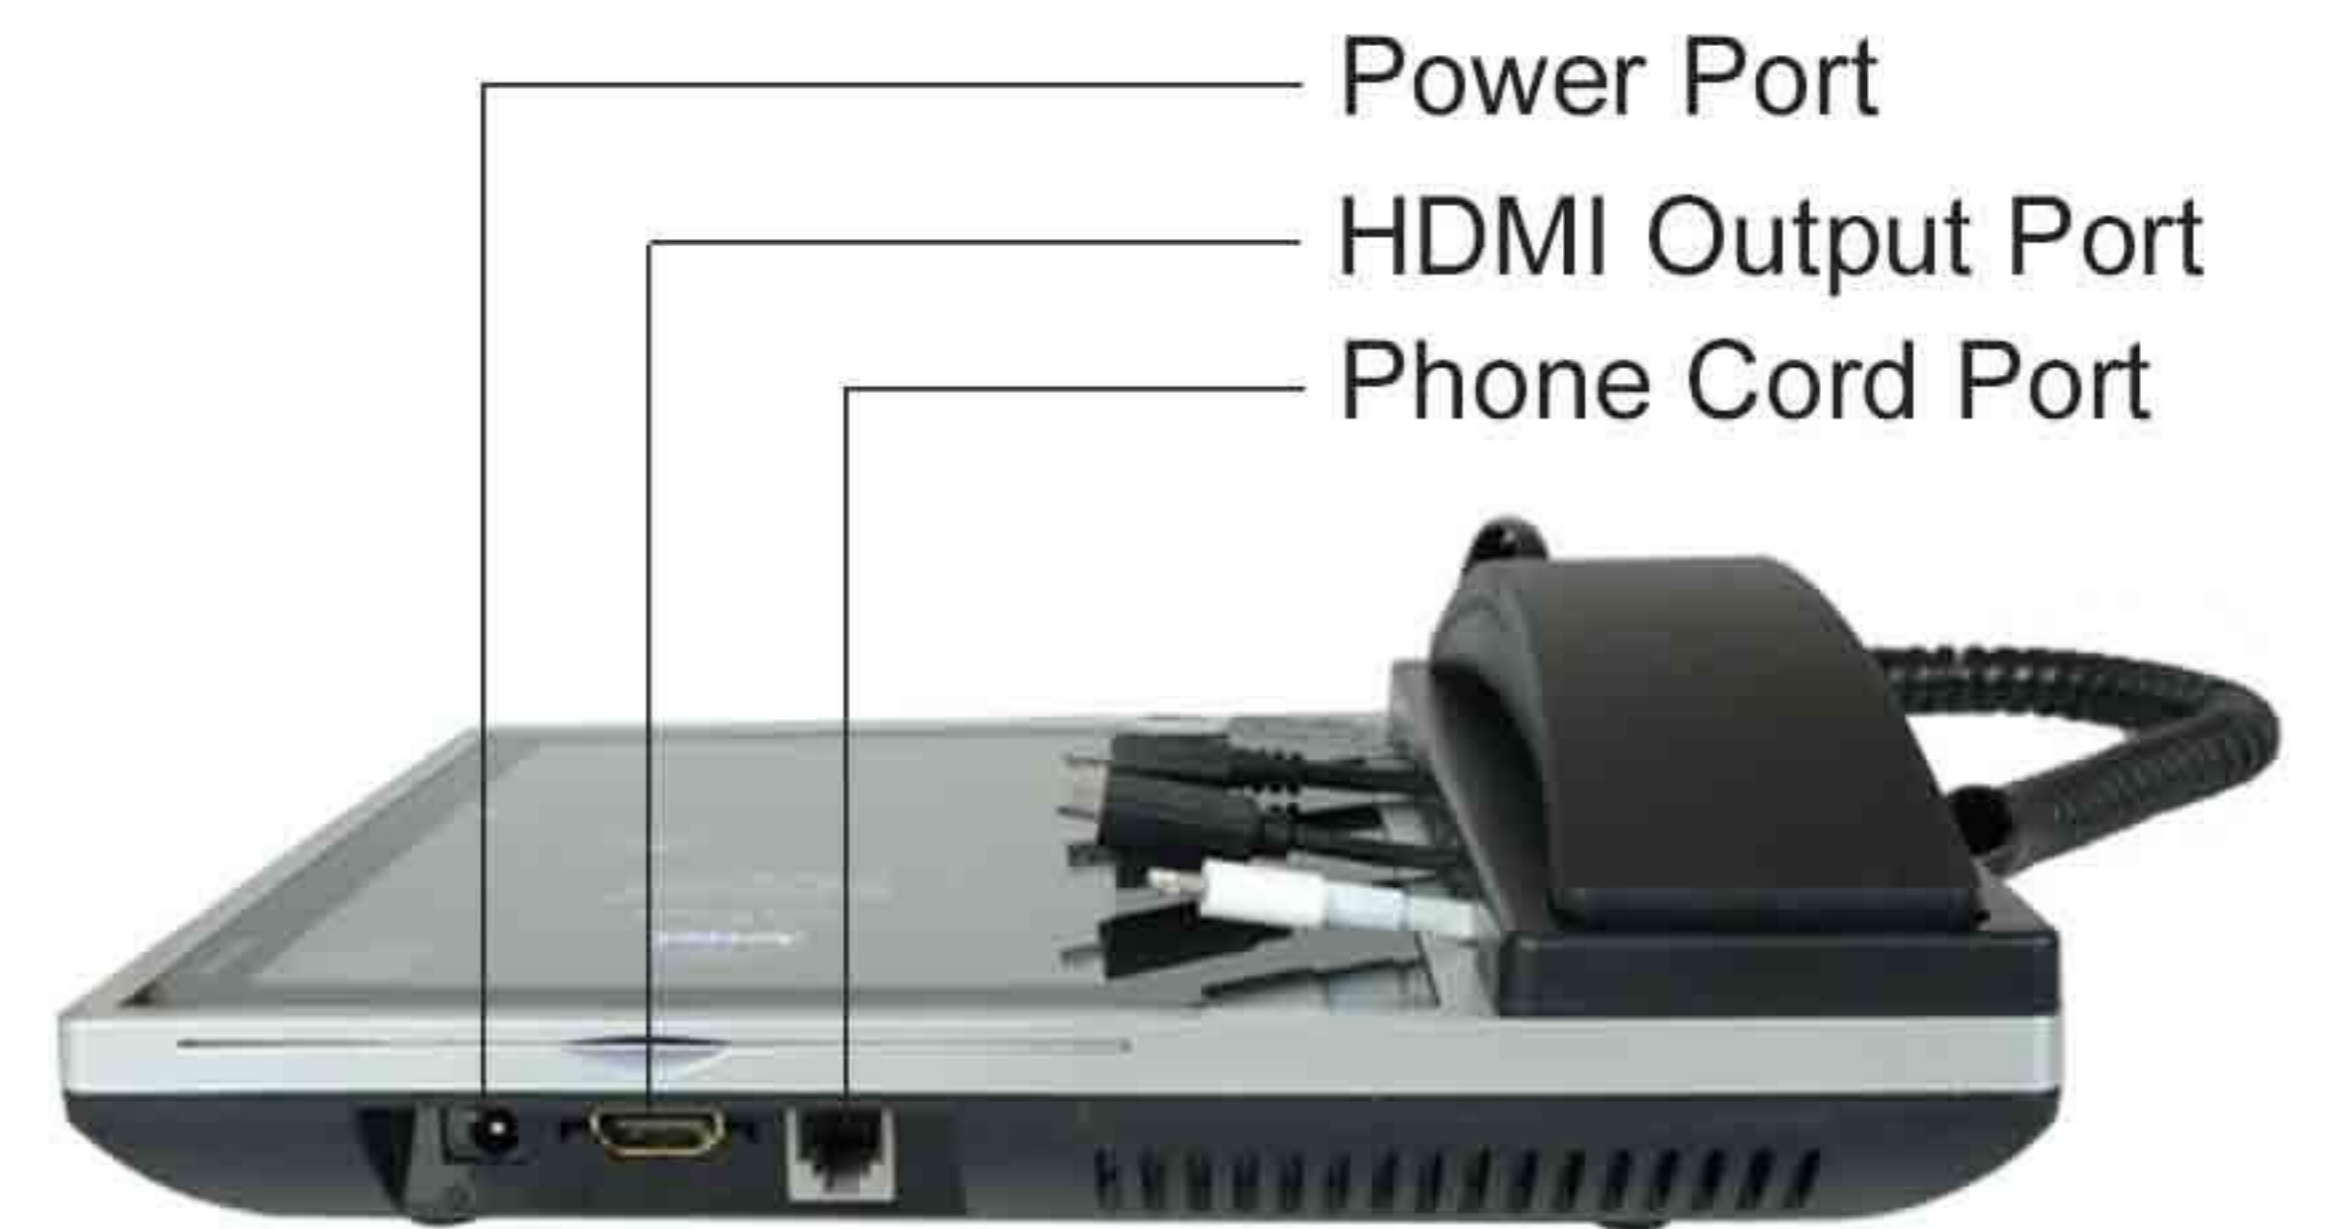

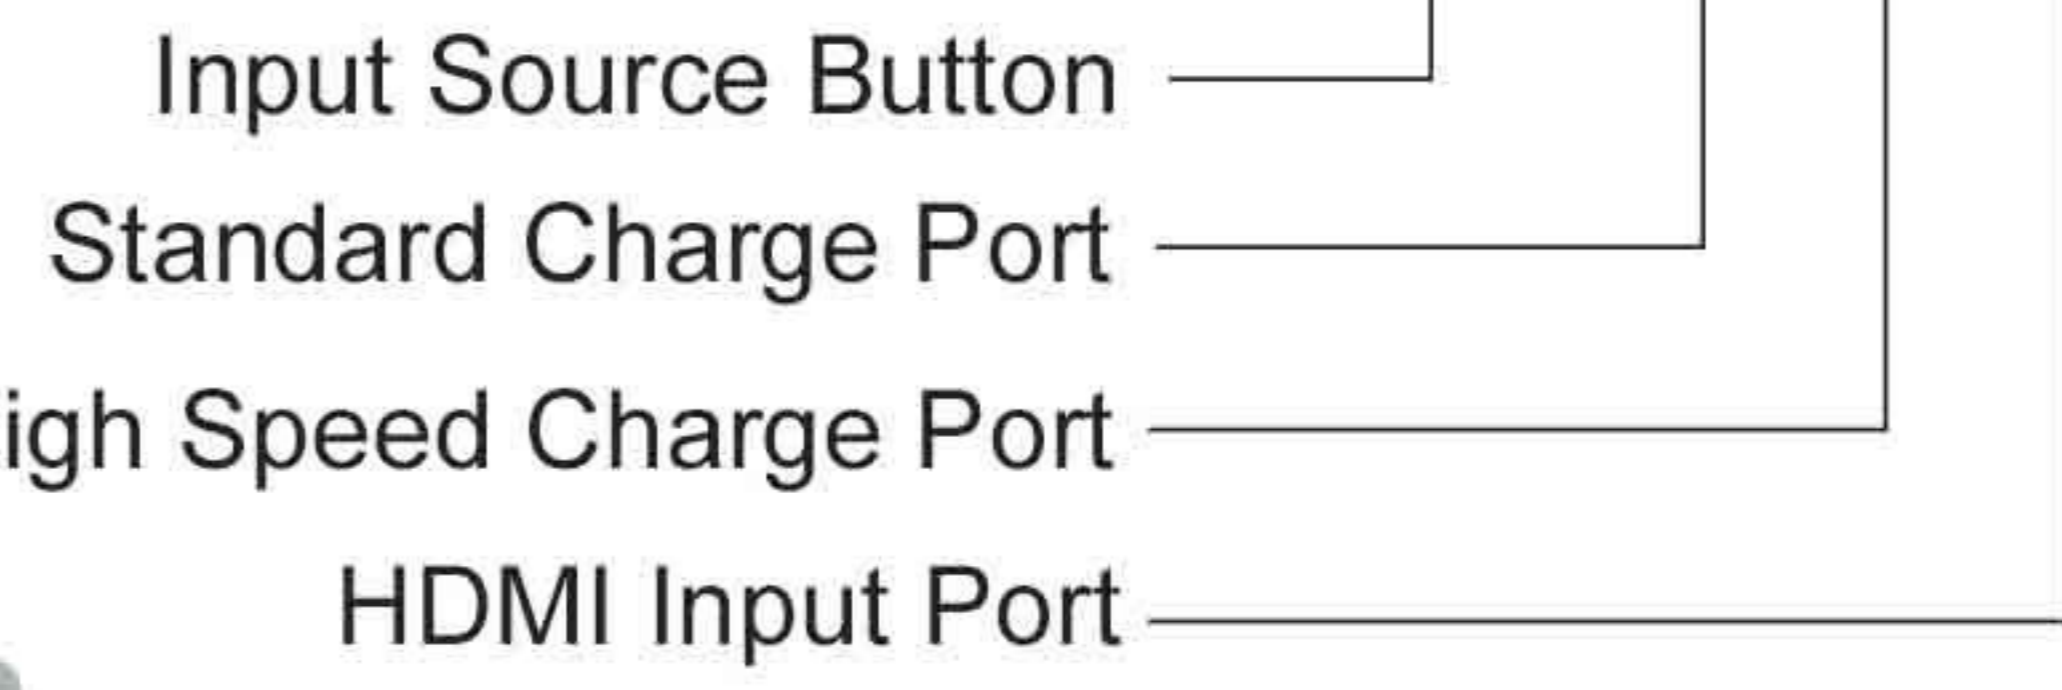

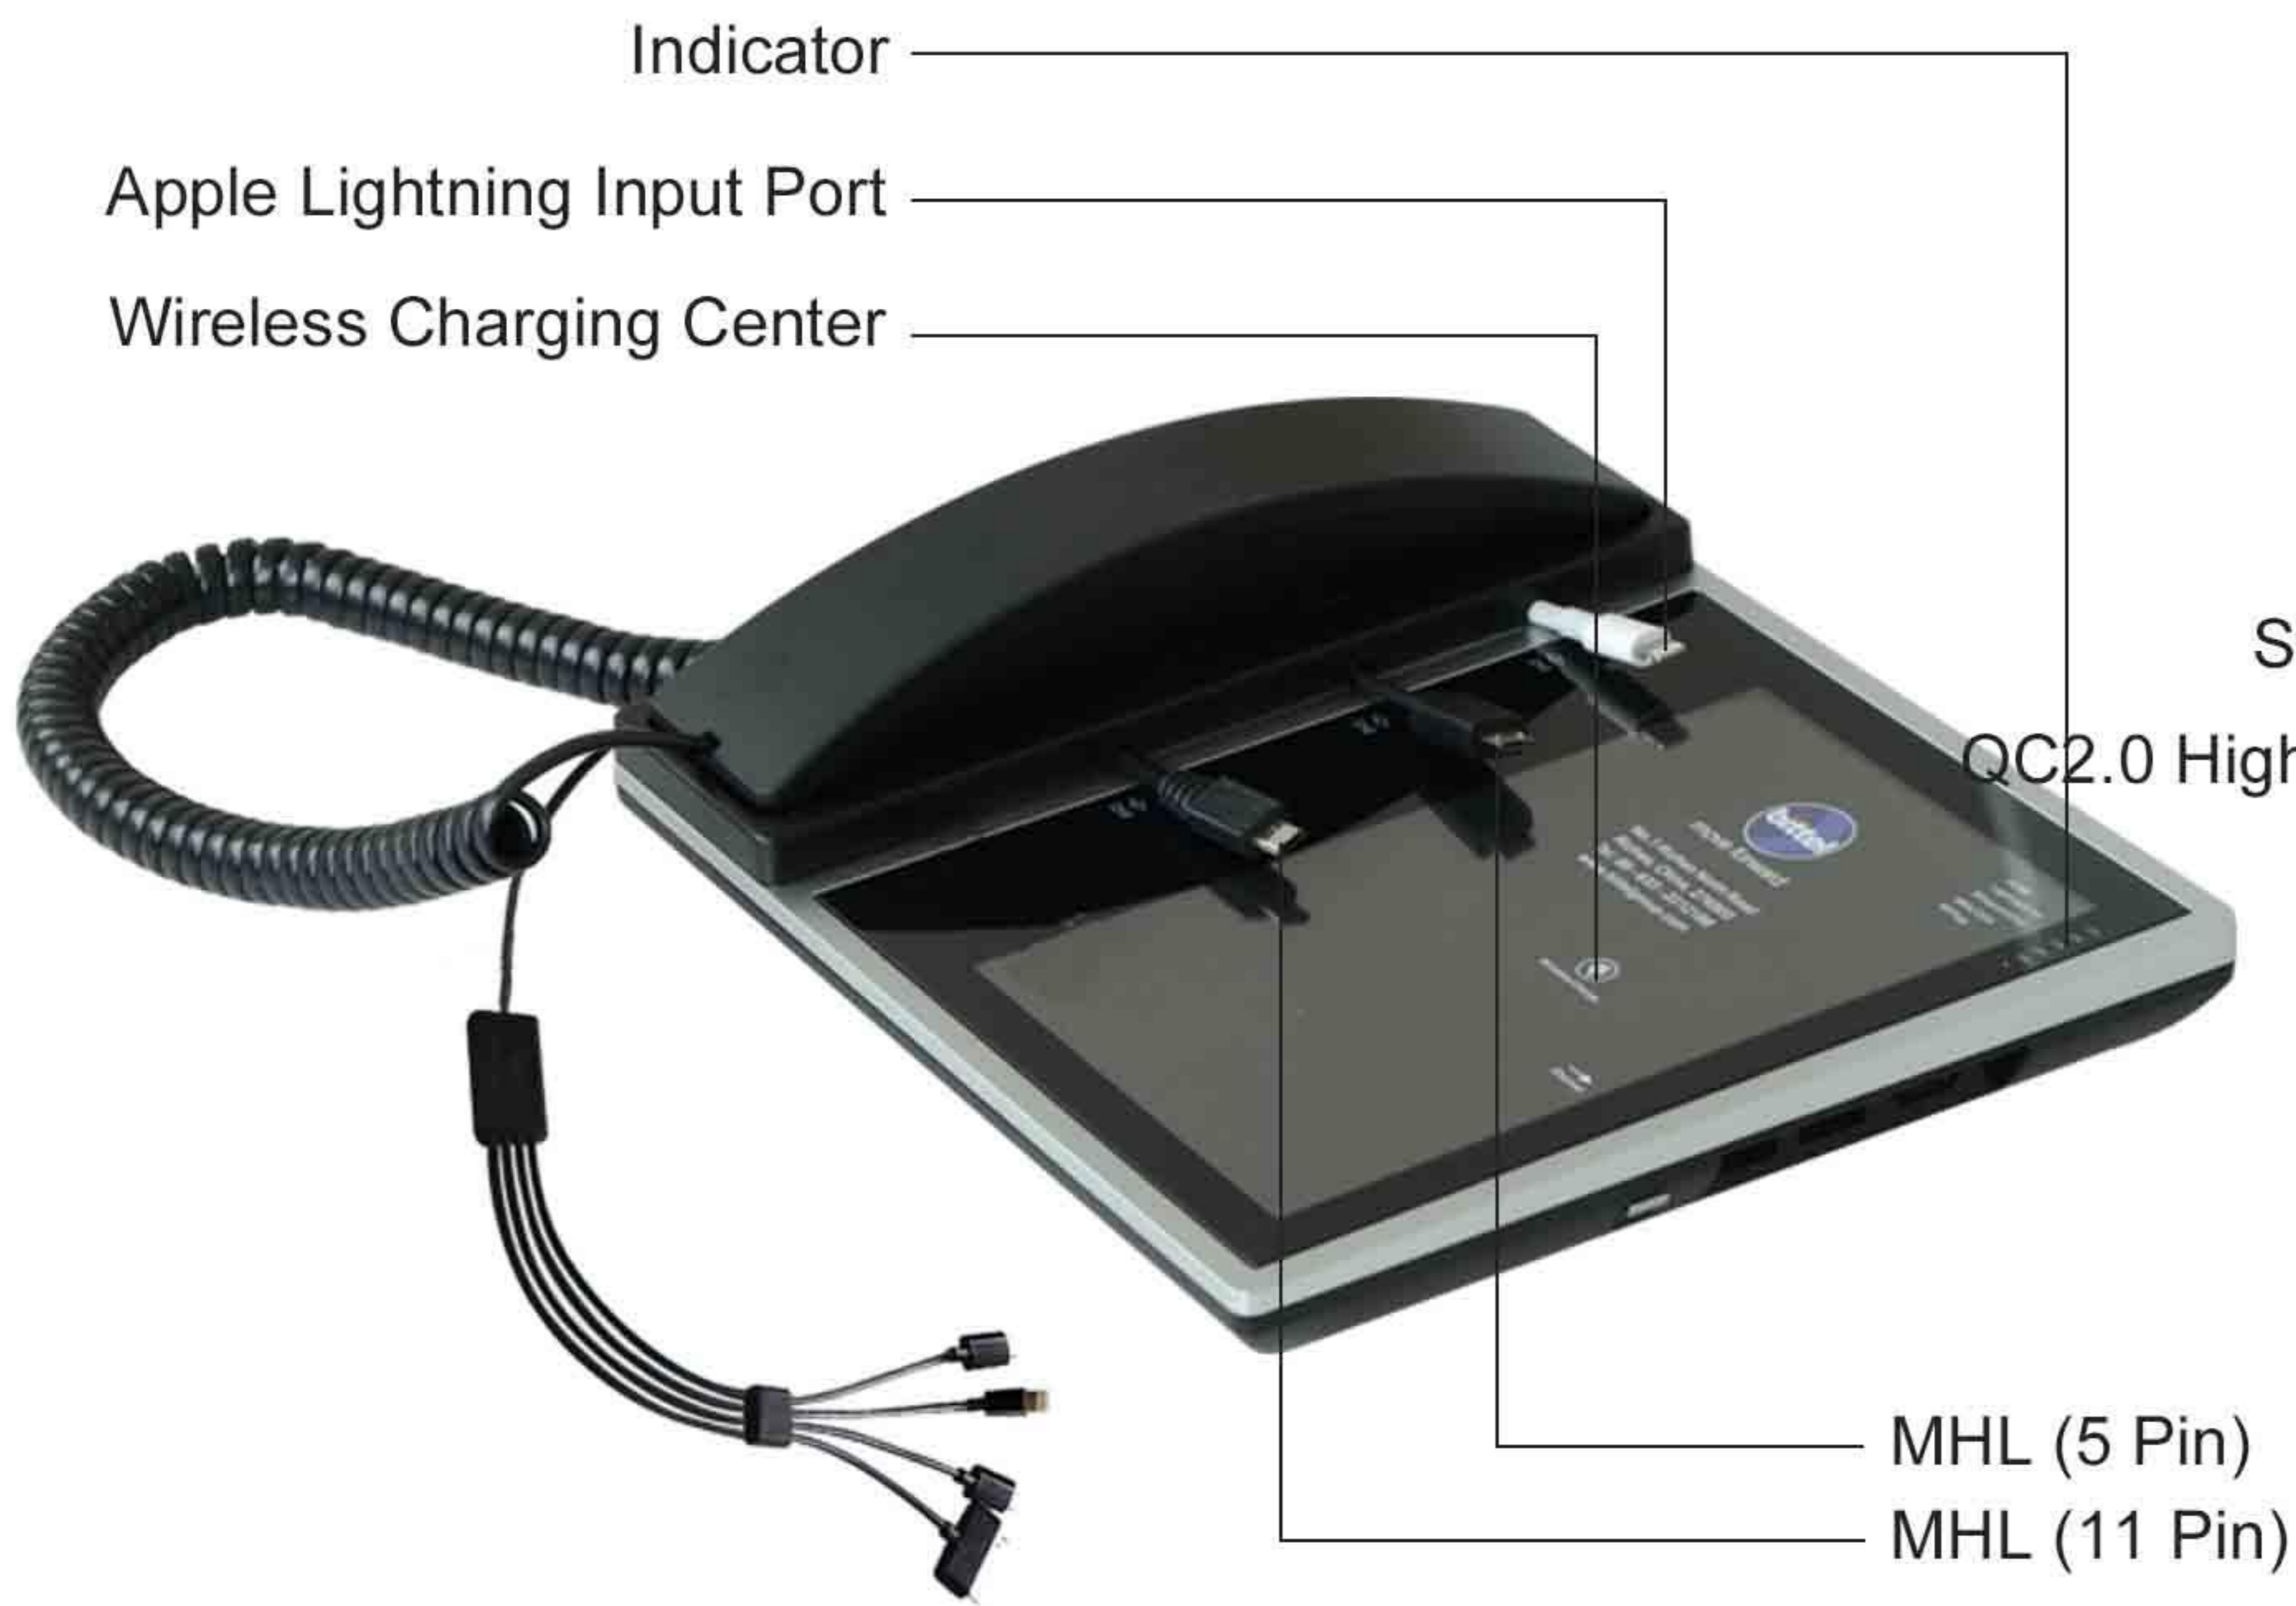

iMediaCast is intuitive and comes with three wired-connection options, which supports most mobile devices along with a wireless connectivity module that supports Miracast and Airplay.

It also supports two kinds of charging solutions for the mobile devices: wired and wireless.

It connects easily to the existing TV's HDMI port and does not require network or TV upgrades. Guests can access content using their own LTE or 3/4G network or be given access the hotel's Wi-Fi network.

The preferred location is on the writing-desk under the TV.

Benefits for Guests

- iMediaCast can not only supply charging feature for the mobile devices which is very important for guests, but also can help them enjoy their favourite contents on a large screen.
- Further more it's easy to operate without downloading any software.

Benefits for Hotels

- Save Expense
iMediaCast owns two USB charging ports and one Multi-Function cable, which can charge different devices. So hotel needn't supply extra power outlet, which can save much money.
- Easy to install
iMediaCast just needs one HDMI cable and one power connector, so it's easy to be installed. The most important is it won't destroy the hotel current decoration. So no matter new hotel or old hotel can choose this solution.
- Improve hotels' technical level and Occupancy rate
With iMediaCast, guests can freely stream their favourite content from their personal devices to TV, which is very cool and useful. So it will attract more guests, which is helpful for raise rate.
