Bittel Hospitality Phones

Outstanding Value. Rock Solid Dependability.

Bittel offers a full complement of guest room phones to fit any room, and any budget. Our sleek 38 series delivers classic hotel phone lines in a multitude of configurations that are priced right. The euro-inspired 48 series provides a dramatic flair and the unique option of membrane keypads, which are the most moisture- and humidity-resistant designs in the industry. Our 58 series presents a compact curved design with optional display, in both analog and IP. And our 41 series trimlines offer outstanding performance and design in an affordable package.

Uniquely Positioned

Bittel Americas is always close by, ready to support all your needs. Our San Jose headquarters provides fulfillment, customer service, and pre- and post-sales support. Regional sales offices in Dallas, Atlanta, and Lima provide rapid response and world-class follow through. No matter where you do business, Bittel is there with the answers and solutions you need to keep you running smoothly.

Over 20 Years of Excellence

Bittel was founded in 1989 with more than 20 years experience in communication industry, which collects self-designing, developing, manufacturing and sales in one.

In 1998, Bittel started to operate the hotel phone business with a Four-Step Professional approach: Professional design, Professional manufacture, Professional sales and Professional service, Bittel became one of the two leading brands in the world after 10 years development with extinguished products and service.

Bittel insists on tradition of superior in quality and advanced technology. Aiming at solving the restrictions of traditional hotel telephone, Bittel innovations focus on humanized, guest-friendly and intelligent products and features. Bittel has obtained over 30 patents for innovations such as Double-dial pads, AutoConnect and EZ Message Light. Our latest innovation is the patented Express Programmer, the online program cloner technology. The character of Bittel core innovation is humanization. Every detail addresses a focus on guest cure and hotel customer service.

Bittel recently unveiled new generation multi-media centre called UNOMedia 6, which combines the essential features & functions required by hotels such as Bluetooth, NFC, charging station, radio, alarm clock and hotel phone in ONE.

UNOMedia 6 is a multi-media loudspeaker phone which combines telephone and loudspeaker together. The loudspeaker part is an independent module; it can be detached from the phone and can be sold alone.

iMediaCast

Connect mobile devices to the TV.
Connection options for most devices.

iMediaCast offers an innovative, affordable way to upgrade hotel in-room entertainment offerings which enables guests to effortlessly mirror and stream content from their mobile devices to the in-room TV.

iMediaCast is intuitive and comes with three wired-connection options, which supports most mobile devices along with a wireless connectivity module that supports Miracast and Airplay.

It also supports two kinds of charging solutions for the mobile devices: wired and wireless. It connects easily to the existing TV's HDMI port and does not require network or TV upgrades. Guests can access content using their own LTE or 3/4G network or be given access the hotel's Wi-Fi network.

iMediaCast

JACOB JENSEN™

Bittel is the exclusive manufacturer of JACOB JENSEN™ for the hospitality market. Designed specifically for the hotel space, JACOB JENSEN™ HT60 and HT20 were originally developed in Denmark through a close partnership between Bell Xpress A/S and the Jacob Jensen Design Studio.

HT60

The JACOB JENSEN HT60 handset lifts elegantly into your hand at a light push on its upper part. The phone is equipped with a display, 3 direct memory keys, 10 secondary memory keys, a last number redial and mute function. The ringtone can be switched from high to low, and the phone can be used on a switchboard. The phone also features a removable base, which makes it suitable for both table and wall mounting. Available in analog, SIP, corded or cordless DECT (black/silver only).

HT20

The JACOB JENSEN HT20 is one of the smallest hospitality phones on the market today and provides ease of use with its keyboard positioned under the handset. The handset lifts elegantly into your hand at a light push on its upper part. The phone is equipped with 2 direct memory keys, 10 secondary memory keys, a last number redial and mute function. The ringtone can be switched from high to low, and the phone can be used on a switchboard. The phone also features a removable base, which makes it suitable for both table and wall mounting. Available in analog, SIP, corded or cordless DECT (six different color combinations, pictured above)

JACOB JENSEN™

A modern, modular and stylish solution unlike anything previously seen in its portfolio. MODA, designed by Jacob Jensen, will equip hotels with beautifully-designed, stackable, smart devices that meet the needs of today's modern travelers. MODA options include a Charging module, Alarm/Clock module, Speakerphone module, Bluetooth Speaker module, Casting module, and Voice-Recognition module.

How Do Your In-Room Components Stack Up?

The base component of MODA is its Charging module; it is this module that powers the entire "stack" of smart devices. The Charging module features two USB ports and one USB-C port. Guests use convenient, magnetically attached cables to charge their devices. Wireless charging is an optional feature. Hoteliers can then build onto this Charging module with one or ALL of the following components:

"Call the front desk"

Modern | Modular | Stylish

Components

Alarm Clock Module

MODA's TRU-TIME technology insures the clock time is correct today... tomorrow...always, improving the guest experience and reducing housekeeping effort. It also includes an auto-dimming feature with an ambient light sensor and an easy-to-set single-day alarm with 10-minute duration.

Speakerphone Module

MODA's high-performance speaker phone and four guest-service buttons enable guests to easily reach hotel services. Optional corded or cordless handset supplements MODA's speakerphone.

Bluetooth Speaker Module

NFC enabled and features high-performance sound

Voice Recognition Module

All MODA modules are "Voice Ready" and designed to work with voice recognition technology.

Casting Module

MODA offers a wired casting option to Apple and Samsung devices or wireless casting to all devices.

JACOB JENSEN™ MODA

NEO's Ultra thin design by Internationally renowned design firm, easily complements today's modern guestroom. Its small footprint makes managing the desk space easy. The optional high powered mobile device charger provides guests with convenient fast USB Charging and the patented MCC (Multi Connector Charging) allows your guest to charge multiple devices without using their own cables

Neo DECT's lithium Ion battery backup supplies up to five days of standby and 8 hours of talk time in the case of power loss. The LED status indicator eliminates the guess work of the battery backups condition.

Available in in a variety of color combinations for different hotel interior designs.
