

Low Voltage, High Performance

Businesses have a variety of low voltage cabling requirements. And installing low-voltage cabling solutions is more than just lining up some wires. Recognizing the long-term investment and critical functional nature of the structured cabling environment, **Norcom Solutions** recognizes the importance of low voltage design, exceeding expectations of all our clients.

We start each project with our consulting services, to understand your unique needs, helping you figure out the right cabling solution for your business. This includes designing the perfect layout and picking the right equipment for maximum efficiency, reliability and security. We develop a design for the project by delivering milestone documentation throughout the design process, coordinating with the rest of the design team.

Once we have the plan for your low-voltage cabling solution, our highly-qualified technicians will install the equipment and test it to ensure complete integration with your current systems.

1 DESIGN
We draw the Low Voltage SDs and DDs with your architect

2 BID
We bid out the project to our distributors.

3 BUILD
We install the Low Voltage infrastructure and oversee the project (including regular meetings with GC, Electrician, MEP contractors, IT integrators, etc.)

Over 25 years – handling all your low voltage needs.

Whether upgrading your system, installing a new one, or doing a complete move, we provide top-notch low-voltage cable management for your business needs. Feel confident in knowing that from project conception to completion, **Norcom Solutions** provides the design expertise you need – where and when you need it. By planning before building, you can ensure the success of your project.

If you're interested in getting a turn-key solution for your next project, contact **Norcom Solutions** today as our team of experienced project managers and professionals can develop a plan that fits your organization's needs, budget, and timeline.

Whether you have questions about design-build, design-bid-build, or want to discuss your next project, our team is ready to help.
